PhD Positions

Quantum Physics and Quantum Biology
University of Crete

There are PhD positions at the Laboratory for Quantum Physics and Quantum Biology, at the Physics Department of the University of Crete. Current research topics include quantum metrology and ultra-sensitive magnetometers (experiment), application of quantum optics in the physiology of vision (experiment), quantum dynamics of the radical-pair mechanism (theory), spin dynamics in photosynthetic reaction centers (theory). More information at ikomonis@physics.uoc.gr.
