Re: Prof. George Zoupanos

L.S.;

This is a letter of support for Prof. George Zoupanos.

I have known George for quite some time. I met him for the first time in France, where we both participated in a Summer School. Later I met him several times at CERN, Geneva, and I also remember participating in a Summer School that he had organized at Corfu. In short, like me, he was an active member of the international group of particle physicist.

I know George very well as a senior scientist that Greece can be proud of. He has actively participated in many scientific events, and he always made substantial contributions. I can testify to his high standing as a scientist and educator.

Regards,

A handwritten signature in black ink, appearing to read 'M. Veltman', with a long, sweeping underline that extends to the right.

Martinus Veltman
